Clue 3

So far we have completed triangles with a square in the middle using our light and medium fabrics and flying geese also using our light and medium fabrics. Today we will be working with our LIGHT and DARK.

Now for a bit of the harder work, I found it easy using the template I drew and the tri-recs ruler for the outside triangles. Once everything is cut out, you will just whip right through these units. I am sure you will find this unit the most challenging, but it's still easy, LET'S DO THIS!!

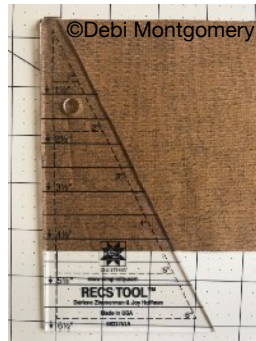

*From your **LIGHT**:*

Cut 4-3/8" strips, you should get 9 of the templates out of each strip. I stacked and cut at least four at a time. If you have any 4-1/4" strips from clue one left, you can try to squeeze a couple on there??

From your **DARK:**

Cut 4-3/4" strips, placing two strips RST, using the outside angle of the tri-recs (recs part) OR the template below, cut mirror image sets of these "wings". Again, you can stack and cut as many as your blade can handle. The pic is of the Recs part of the tri-recs tool. If you are using the template I provided, you may want to cut your strips at 4-7/8" or you will have a flat top (which is no trouble!).

We will be sewing these together like flying geese. Pretty easy, huh!?! Hardest part is the cutting.

Can't wait till next week, we start sewing our units together, YAYAYAYAYAY!!!

Here are your requirements, remember you can get 9 kites from a strip. Please also remember to make your "wings" MIRROR IMAGE.

	Lap	Twin	Queen	King
LIGHT Kites	40	72	84	144
DARK Wings	40 sets (80)	72 sets (144)	84 sets (168)	144 sets (288)
