Clue 6 REVEAL

We have everything ready for the reveal of this delicate beauty. I can't wait to show you what curves, HSTs, rectangles, squares, and other triangles can look like once we put them all together. This is a beauty. This is assembled on point. Those triangles we cut in the second part of Clue 1 will "square" off the four sides. Rectangle version, if you used the rectangle version throughout the instructions, you will need to make two more of two blocks or cut some blank space to finish off your design.

HERE SHE IS! (Rectangle computer generated version on second page.)

Rectangle version ("my" version") idea for you:
